PROFESSIONAL EXPERIENCE

VOLUNTEERING

Apr 2023 - Present

Sindicatul Studentilor din Cibernetică (SiSC)

Key Roles: IT Back-End Member (2025-present), DevOps Member (2025-present), External IT Division Leader (2024-2025), HR Member(2023-2025)

As an **HR team member** (2023-2025), I developed **strong communication skills**, efficiently handled conflict resolution, **organized team-building events**, and provided **constructive feedback**. During my time as the **External IT Division Leader** (2024-2025), I worked closely with the IT department, contributing to both technical initiatives and internal events that **fostered team motivation** and cohesion. I also gained experience collaborating on projects using Git and other development tools. Afterward, I transitioned to the **Back-End Division**, where I actively contributed to various projects with the support of a mentor. I later joined the **DevOps team**, where I manage deployments using **Nginx**, **PM2**, and the **CLI** via **SSH**. I've also worked with **reverse proxy configurations** in Nginx to efficiently route traffic and enhance application performance and security.

Apprenticeship

Code of Talent (May 2025)

As part of the mandatory internship for the second semester of university, I had the opportunity to work at the start-up Code of Talent, in the **Back-End division**, where I was able to learn about a company's workflow when it comes to programming in **PHP**.

Tehcnical Experience

- Collaborated on the **development and maintenance** of internal **websites and applications**, utilizing **Node.js**, **Express**, and **Sequelize** for backend architecture, with **HTML5**, **CSS3**, and **JavaScript** for responsive frontends. In the past i worked on **Academia SpErantei** and **IT Fest**. Currently i am **part of development team** for Spring projects, including **Spring IT**, **Tap That Job**, and **Serile Teatrului Studentesc**.

Personal Projects

- Wake on WAN and RDC
 - Configured a modem-router topology with Static DHCP, DDNS, and Port Forwarding to enable remote Wake-on-LAN and RDC access via mobile automation.
- Personal Portfolio (eduardbonea.com)
 - A professional showcase of full-stack projects, featuring integrated live demos and open-source code repositories.
- ITP App (itp.eduardbonea.com)
 - A **Node.js & Sequelize** management tool for auto shops, featuring **real-time database access** and automated **Twilio API SMS** reminders. This platform streamlines the **scheduling** process and improves **customer** retention by automating **appointment** notifications.
- Flow Payment (flow-app.eduardbonea.com)
 - Developed a web-based **payment request** application (inspired by Tikkie) using **Node.js**, **Express**, and **Sequelize**. The platform enables users to **generate** dynamic **QR codes** for **payment requests** and features a real-time notification system to track request statuses. Implemented a lightweight frontend using **ArrowJS** to manage state and UI responsiveness efficiently.
- CCTV App (cctv.eduardbonea.com)
 - Designed and deployed a containerized **surveillance system** using Docker, enabling **real-time monitoring** and **archival** access for **RTSP camera feeds**. Engineered a robust media pipeline using **FFmpeg** to transcode live streams into browser-compatible formats (**HLS/DASH**). Implemented secure **JWT authentication**, a **React-based dashboard**, and **Sequelize** ORM for efficient metadata indexing and retrieval.

SKILLS

Effective communication
Time management

Adaptability
Honesty

Team leadership
Communication

EDUCATION

BUCHAREST ACADEMY OF ECONOMIC STUDIES

Faculty of Cybernetics, Statistics and Economic Informatics

- Student of Statistics and Data Science 2023-2026 promotion

CERTIFICATIONS

- English Assessment - B2

- CCNA (in progress)
